The Pre Wine Workshop Tour (Sunday, 7 February) will depart North Terrace by 9.00pm and include stops at 3 of the most well known Barossa wineries, including Wolf Blass, Yalumba and Orlando Wines at the Jacob's Creek Visitor Centre.

Much has been written about wine's globalization over the past two decades, during which time the share of global wine production exported more than trebled, to around 30%. But other dramatic changes are in store for the next two decades, both in production (climate change, concentration and multinationalization of firm ownership in winemaking and retailing, emergence of Asian wineries) and consumption (income growth, population ageing, westernization of diets, environmental and health concerns of consumers, wine taxation and regulation). Together these forces are altering national and regional comparative advantages, inter- and intra-national trade, and investment patterns.

In addition to parallel Contributed Paper sessions at the workshop, there will be four Plenary Sessions at which economists and industry leaders will deliberate on where the industry is headed.

Title: ***Workshop 2 – The Role of Value Chain Research in Agriculture and Food Policy***

(Proudly sponsored by the Australian Centre for International Agricultural Research)

Date: Tuesday, 9 February 2010

Time: 9.00am – 5.30pm

Cost: Earlybird Registration (before 01/01/10) - \$150.00
Regular Registration (from 01/01/10) - \$170.00

Inclusions: Morning and afternoon tea, lunch and any relevant paperwork.

This one-day pre conference workshop examines the public and private benefits of value chain research. The workshop explores developments in research methods, recent empirical findings, and implications for agriculture and food policy.

The workshop aims to gather researchers, industry representatives and the policy community to discuss, debate and share experiences with the policy and project lessons emerging from value chain research.

Among the workshop goals include to:

- ◆ promote a common understanding of the role of value chain research in public policy analysis;
- ◆ examine the strengths and weakness of alternative value chain research methods;
- ◆ review the private and public implications of rapidly transforming food chains;
- ◆ assess the benefits and costs of public-private value chain partnerships;
- ◆ present country case studies of public policy experiences and innovations in food value chains.

For further information, please contact the Workshop Conveners, Professor Randy Stringer, University of Adelaide (randy.stringer@adelaide.edu.au) or Gavan Dwyer, Victorian Department of Primary Industries (gavan.dwyer@dpi.vic.gov.au).
